Advanced Boiler Control from Beckett

The Beckett AquaSmart is an advanced, microprocessor-controlled device for boiler (hydronic) heating systems. It reduces fuel consumption up to 20% by automatically adjusting the boiler temperature to meet the actual heating need of a home. With the AquaSmart you will enjoy lower heating bills season after season.

Important AquaSmart Benefits for your Home

- Reduce fuel consumption up to 20%
- Short payback period
- Reduce system maintenance and extend boiler life
- Fail-safe operation
- 18 month replacement warranty
