

HOT DAM!

When You Need to Stop Heat Cold, Count on HOT DAM!

Completely stops heat transfer down ferrous or non-ferrous pipe.

Easily molds like clay to any shape you need.

Can be used over and over.

Removes quickly and cleanly after each application.

No drip, mess or residue.

Ideal for applications in plumbing, ac/r and maintenance.

Simply stores in a 3/4 lb. container.

*Hot Dam!
keeps the heat
in its place.*

**GETS
HOT!**

REUSABLE

**STAYS
COOL!**

Many applications in soldering and brazing require that critical components and valves be protected from excessive heat.

Trust Hot Dam!

Hot Dam! works equally well with Mapp gas, propane, arc or oxyacetylene welding on all ferrous and non-ferrous surfaces.

Simply mold Hot Dam! around the section of pipe where you want heat to stop. Since it's non-toxic, you can handle it without any special precautions.

P/N 9000

- Hot Dam is recommended for use with pipe-freezing equipment to protect Ice-Plug and Jackets.
- Hot-Dam protects Rubber Plugs on our #5000 & #5001 Pipe Plug products.
