Inhalant Abuse.

Breathing in vapor or gases to reach a high or altered state of mind, commonly called

"Huffing, Sniffing, Bagging or Dusting". Inhalants are legal and found in everyday products like glue, paint and the refrigerant gas in your HVAC unit.

Over 2.6 million children, aged 12-17 use inhalant each year to get high. Special tools are required to apply and remove the caps, making it difficult for non-professionals to access the refrigerant.

Proven, instant protection.

Novent® protects lineset refrigerant gas against intoxication by inhalation of toxic refrigerant gas. Special tools are required to apply and remove the caps, making it difficult to access the refrigerant. They are code compliant, proven to reduce venting, energy loss, and provide protection from serious injury or homeowner liability.

Insist on code compliant caps.

The International Mechanical Code and International Residential Code require that all outdoor access ports on AC Refrigerant circuits be fitted with locking-type caps to make tamper resistant, and whenever refrigerant is added to or recovered from systems. Novent® locking AC refrigerant caps are the proven code compliant solution in the marketplace.
