LEAK SEALANTS

Flex Inject® Sealant Advanced & Total

Flex Inject® Sealant Advanced is the fastest, most effective proven way to permanently seal and prevent minor air conditioning and refrigeration (AC/R) leaks. With no tools or gauges required, the Flex Inject® Sealant Advanced works by travelling through the system with the oil and refrigerant fixing leaks immediately (up to 300 microns). Flex Inject® Sealant Advanced works with all compressors, heat pumps, condensers, and other system components and it will not plug up manifold gauges, metering devices, thermostatic expansion valves (TXVs), pistons or cause cap tube blockages. It meets the ASHRAE ARI 700 refrigerant standard and is compatible with any refrigerant including R-410A with no pump downs or recoveries required. Flex Inject® Sealant Advanced is suitable for use in aluminum and copper coils and is microchannel friendly. Flex Inject® Sealant Total has all the benefits of Advanced and includes UV dye.
