

PlenumPlus™

Commercial-Grade Condensate Pumps

WHAT'S IN YOUR CEILING?

*When safety counts, you can rely on
Hartell PlenumPlus™*

 **HARTELL®**

PlenumPlus™

Commercial-Grade Condensate Pumps

WHAT'S IN YOUR CEILING?

Your HVAC system design maximizes performance and safety. You have taken great care to help ensure that everything is sized right, performs flawlessly, and that the building materials, cabling, and insulation in all air-handling spaces meet all the applicable NFPA codes. Shouldn't your condensate pump do the same? Hartell PlenumPlus™ condensate pumps do! Of course, these pumps make handling condensate easy with an exceptionally robust design, high pumping capacity, and large reservoir, but it's what they don't do that makes them perfect for all of your discrete plenum applications. Hartell PlenumPlus™ condensate pumps don't burn easily. In the event of a fire, they won't give off excessive heat or smoke. With Hartell PlenumPlus™ pumps, you get performance *and* safety—right out of the box—in an easy-to-apply standard package.

UL 2043 TESTED
PLENUM RATED
1-YEAR WARRANTY

To prove their advantages, Hartell PlenumPlus™ pumps have been successfully tested in accordance with United Laboratories 2043, *Fire Test for Heat and Visible Smoke Release for Discrete Products and Their Accessories installed in Air-Handling Spaces*. This test is designed and tested by United Laboratories to help ensure products meet the requirements for fire-resistant and low-smoke-producing characteristics as outlined in *the National Electric Code, NFPA 70; the International Mechanical Code, NFPA 5000; and the Standard for the installation of Air Conditioning and ventilating Systems, NFPA 90A*. Would you like to see the videos of our tests? We would be happy to share them, but we must warn you that they are extremely boring. That is the hallmark of a successful test—very little excitement, and that is just the way we like it.

We hope you never have to put Hartell PlenumPlus™ condensate pumps to the ultimate test, but isn't it reassuring to know that we already have? So play it smart and play it safe; make Hartell PlenumPlus™ pumps your standard for condensate service.

Visit the ARCAT site at www.arcat.com for downloadable PlenumPlus™ Commercial Grade Condensate Pump specifications and CAD drawings in popular formats.

For more than 50 years we've been committed to performance and safety, designing pumps reliable enough to stand the test of time and safe enough to be trusted in the most important applications.

We are Hartell and we are making a difference.
