

Common Maker

- The FAST-STAT Common Maker for nest thermostats provides a common connection for 24 volt power without the need for any new cables
- It eliminates the possibility of power related problems
- Many types of HVAC equipment have high impedance inputs on the equipment control boards and this can cause the thermostat to not have enough power to sustain operation
- The FAST-STAT Common Maker eliminates short cycling that occurs when the nest thermostat needs to recharge its battery
- The FAST-STAT Common Maker eliminates false triggering that can occur when the nest thermostat is operating (starting cooling when heating is on or vice versa)
- Works with oil burner and zoning systems that use T1 & T2 thermostat connections without the need for an isolating relay
- The FAST-STAT Common Maker is a low cost, high reliability product that comes with a life-time warranty
