Corrugated stainless steel tubing has revolutionized the gas-distribution business virtually rendering conventional black iron pipe obsolete. Back-breaking iron-pipe that demands eight or ten laborers for all the lugging, cutting and threading can now be handled with ease by only one or two certified CSST installers – freeing up precious labor for other tasks that will keep your project moving forward. Meanwhile, lightweight and flexible Gastite and FlashShield will slash installation time up to 70%.

Our job at Gastite is to make your job easier – and more profitable – by providing products and services that are second to none in our industry.

FLASHSHIELD™ – SAFETY IN LAYERS, WITHOUT ADDITIONAL BONDING

PRODUCT DESCRIPTION:

FlashShield™ is CSA design certified to ANSI LC1-2005 for “Fuel Gas Piping Systems Using Corrugated Stainless Steel Tubing (CSST).” CSST supplies natural gas or liquefied petroleum gas (LP gas) to appliances. Simple hand tools such as tubing cutters, wrenches and utility knives are all that are needed to work with the FlashShield components. FlashShield is a reliable, cost-effective system that can be installed in all modes of construction: residential, commercial and industrial; new construction and retrofits.

FlashShield is a patent-pending multi-layered CSST product designed to create a lightning-resistant system. We started with a unique layer of metal mesh, which is designed to dissipate heat and electricity. Then we placed the mesh between two jackets of semi-conductive polymer. To complete the system, we redesigned our fittings to ensure seamless continuity with the mesh. FlashShield fittings are designed with a patent pending feature that bites through the first layer of semi conductive polymer and into the metal mesh. This creates electrical continuity throughout the system. The FlashShield system eliminates the manufacturer’s requirement for direct bonding. The fitting’s sealing surface does not sit on the cut end of the tubing, so even the most unsightly cut will yield a tight seal. The FlashShield fitting requires minimal torque for easy fitting installation. With no o-rings or gaskets, the reusable brass components provide a reliable metal-to-metal installation.

Recognized as a fuel gas piping material, FlashShield CSST complies with ANSI LC1-2005 for “Fuel Gas Piping Systems Using Corrugated Stainless Steel Tubing (CSST).”

The FlashShield system is listed by several independent third party laboratories and is recognized by model building codes throughout North America.

FEATURES & BENEFITS:

- Metallically-shielded gas piping system.
- Metal mesh layer dissipates electricity.
- New fittings provide continuity with metal mesh.
- No manufacturer-required direct bonding.
- No special routing requirements or restrictions.
- Only product that meets strict criteria of both LC1024 & LC1027
- Flexibility means quick and easy installations. FlashShield installs 30-70% faster than traditional piping methods.
- Pre-marked by the foot, there’s no measuring, rigid pipe cutting or threading. This means less waste and fewer fittings.
- 75% fewer fittings in the average installation means a safer system, less leak potential and reduced callbacks.
- FlashShield CSST is lightweight – 250 feet of 1/2" CSST weighs approximately 50 pounds and can be easily transported and handled on the job.
- Custom lengths of tubing and job-specific accessories for those large and multi-family projects can be easily obtained by a simple telephone call.
- Jacket complies with requirements of ASTM E84 25/50 index for flame and smoke.

FLASHSHIELD CSST — IT'S SAFETY IN LAYERS, WITHOUT ADDITIONAL BONDING.

Gastite's revolutionary new FlashShield CSST provides more layers of resistance than any other CSST, while eliminating additional manufacturer-required direct bonding. FlashShield is the only flexible gas piping system to meet strict criteria of both LC1024 and LC1027. We started with a unique layer of metal mesh, which is designed to dissipate heat and electricity. Then we placed the mesh between two jackets of semi-conductive polymer. To complete the system, we re-designed our fittings to ensure seamless continuity with the mesh. Add it all up, and the FlashShield CSST system gives you a level of lightning resistance that's simply unprecedented.
