

Heat Chief Permanent Split Capacitor (PSC) Oil Burner Motor

Designed to meet manufacturer's requirements for oil burners. Engineered for longer life, reliable performance, cleaner operation and fewer callbacks than conventional burner motors.

HEAT CHIEF MTR0B1

Features:

- PSC reliability and clean operation
- Capacitor is ideally positioned for universal application
- Totally enclosed, non-ventilated (TENV) when mounted
- Automatic reset thermal overload protector
- 104°F (40°C) ambient
- Class F insulation
- 5 year warranty
