

COIL CLEANERS

Triple-D® Universal Coil Cleaner

Triple-D® is the ultimate universal coil cleaner that can be used on condensers, evaporators, microchannels, roof-top units, and mini-split applications. The triple active synergistic highly effective solution is formulated to remove a broad range of soils while degreasing and deodorizing. It is ideal for cleaning most metals including aluminum and copper while extending equipment life and diminishing the potential for refrigerant leaks. Using 75% less than comparable products, it reduces the amount of solution needed to clean. Triple-D® is biodegradable, NSF approved and available in seven different packaging configurations.

Pro-Brown™

Pro-Brown™ is a heavy duty alkaline cleaner that pulls out deeply embedded dirt removing greasy soils and oxidation while brightening and cleaning coils. Ideal for air-cooled condensers and mini-splits thanks to its dual action foaming capabilities. It is biodegradable and NSF approved.

Conventional foaming acid and non-acid coil cleaners attack and chemically react with the aluminum coil components. This reaction is exhibited by a foaming action. The attack/reaction dissolves the aluminum, destroying the heat-transfer ability of the coil and creating the potential for refrigerant leaks.

Pro-Blue™

Pro-Blue™ is a heavy foaming alkaline-based solution designed for condensers and mini-splits that penetrates dirt and grease removing deposits resulting in clean and brightened coils. Pro-Blue is biodegradable, NSF approved, and available in numerous packaging configurations.
